Personal Portfolio

PROFESSIONAL SUMMARY

Final-year CS student at NED University with specialized expertise in LLM integration, NLP, and ML pipeline development. Experienced in deploying AI solutions (FastAPI, OpenRouter), optimizing prompt engineering, and building knowledge graph-driven applications with Neo4j. Seeking an AI Engineer role focused on designing, deploying, and optimizing machine learning models.

EXPERIENCE

Full Stack Development Intern (Remote)

10Pearls | May 2026 – Jul 2026

- Developed a full-stack to-do task management platform utilizing React, ASP.NET Core Web API, and Microsoft SQL Server.

Developers Hub (Remote) Jan 2026 – Feb 2026

- Developed AI/ML solutions across NLP, predictive analytics, and classification tasks, including news classification, customer churn prediction, and automated ticket categorization.
- Built and optimized machine learning pipelines involving data preprocessing, model training, evaluation, and deployment workflows.
- Worked on an AI-powered health chatbot leveraging NLP techniques to improve user interaction and automated assistance.

Intern(On-Site) KDA (Karachi Development Authority) May 2025 - Jun 2025

- Supported technical operations and administrative workflows across cross-functional municipal development projects.
- Gained hands-on experience in large-scale organizational processes.

PROJECTS

CollabriAI (Final Year Project)

- Engineered an AI chatbot with intelligent query routing using Neo4j knowledge graphs
 - Built full-stack solution with React, FastAPI, and Python serving [X] users
 - Integrated multiple LLMs (Llama, DeepSeek, Claude) for dynamic response generation
 - Reduced response time by 40% through optimized query routing algorithms
- 2025-2026

TaskMangement/To-Do-App

- Engineered a full-stack Kanban platform with drag-and-drop workflows, real-time sync, and automated notifications for team collaboration.
 - Built responsive React frontend with ASP.NET Core MVC REST APIs (SQL Server/EF Core), implementing RBAC and optimizing queries to cut load times by ~30%.
- 2026

Health-Chatbot - Safe Medical Advisory Agent

- Developed a safe AI health information chatbot using LLMs (OpenRouter) with advanced prompt engineering and safety filters for reliable, non-diagnostic guidance.
 - Implemented emergency keyword detection, sensitive topic handling, and response validation to ensure responsible and safe user interactions.
 - Tech Stack: Python, OpenRouter API, LLMs, NLP, REST APIs, Git.
- 2025

TECHNICAL SKILLS

Soft Skills: Strong Focus & Attention to Detail, Consistent Work Ethic, Adaptability to New Tools & Technologies

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Backend: Python, FastAPI, ASP.NET Core, C#

Databases: SQL Server, MongoDB, Neo4j

Tools: Git, Postman, Entity Framework, Microsoft OfficeOther: REST APIs, NLP, LLM Integration

EDUCATION

NED UNIVERSITY OF ENGINEERING AND TECHNOLOGY

Bachelors in Computer Science and Information Technology 2022-2026

CERTIFICATES

- JavaScript: Udemy – Meta Brains 2025
- React Js Web Development: IEC (Institute of Emerging Careers) 2026
- Google AI: Coursera - Google Specialization 2026
